

Please Insert Here the Title of Your Work

F. Co-Author⁽¹⁾ and S. Co-Author⁽²⁾

Abstract: *In this part you include the abstract, please try not use more than 300 words. This short abstract may be different from the one sent previously. It is most convenient not to go beyond the first page.*

Keywords: you, may, include, them, here.

1 Introduction

This is supposed to be a quite simple template for the LaTeX file. It uses the package **mathptm**, that you may find in the guidelines page, in case your LaTeX source does not have it. This package allows to use Times fonts similar to the ones used with Word. The **fleqn** style automatically justifies equations to the left, like in this case:

$$u(x) = \sum_{k=1}^n a_k \Psi_k(x)$$

or this

$$\mathcal{D}u(x) = \sum_{k=1}^n a_k \mathcal{D}\Psi_k(x) = f(x). \quad (1)$$

You may use any style in the References section (eg. [1]).

Some newcommands are defined (TheTitle, TheAbstract,...). Please use them to keep to the pages format.

2 Paper Size

The paper size should be A4.

We would like to have all papers starting at an odd page, therefore keep the number of pages to 2, 4, or 6. Please try not to go beyond 6 pages.

¹University I, Address (coauthor1@mail).

²University II, Address (coauthor2@mail).

If you follow these lines, the papers will have (more or less) a coherent style which will benefit the Book of Abstracts. Please send it to us in PDF format.

Acknowledgements: We would like to express our gratitude to all the people that will read these guidelines.
